

OFFER COMPREHENSIVE, WORLDWIDE RAIL OPTIONS THROUGH A SIMPLE WORKFLOW

SABRE RAIL

Travel agents are increasingly expected to offer a wider spectrum of travel-related content and services. Demand for rail travel has risen significantly in recent years but rail tickets, passes and reservations remain too complex for travellers to purchase on their own directly.

With Rail, agents can offer comprehensive, worldwide rail options through a simple workflow, allowing you to expand sales opportunities and value-add to their customer offerings easily.

Take this opportunity to enhance your revenue stream by extending comprehensive rail content to your customers today.

WHAT'S IN IT FOR YOU

INCREASE YOUR REVENUE by providing rail as an alternative travel option to your customers.

EARN DIRECT AND IMMEDIATE COMMISSION from the vendor at the point of payment.

SERVICE YOUR CUSTOMER PROMPTLY with real-time 24/7 access to rates and availability.

WORK FASTER with the new standardised, intuitive web portal that facilitates a single sign-on from your point-of-sale.

AVAILABLE GLOBALLY IN WORKSPACE

HOW IT WORKS FOR YOU

Rail can be accessed vis-à-vis two platforms through the host for airline-style reservation and interline air-rail segments; or via ACP Rail International web portal for even more rail products and options.

Agents can access comprehensive content offering from both host and web portal. As a complement to the host offering, ACP Rail International web portal aggregates more than 30 rail companies content from all major networks in Europe, America, Australia, Japan and more, allowing agents to shop and book both network passes as well as point-to-point tickets.

Both host and web portal have a simple booking workflow too.

Through host rail, agents can search and book AccesRail (9B) within the host screen, alongside other air segments. It also supports e-ticketing and Bank Settlement Plan (BSP) payment, making the entire booking process hassle-free.

Through ACP Rail International web portal, you can access rail options via an intuitive point-and-click graphical user interface.

Bookings via host and web portal are captured in the PNR, facilitating servicing and invoicing.

HOW WILL YOU STAND OUT

MEET CUSTOMERS' DEMAND
for rail travel with comprehensive service options around the world.

SAVES TIME with the new rail web portal's simple workflow as well as its intuitive, point-and-click graphical user interface, without having to obtain individual licenses from the various rail vendors.

ACCESS MORE RAIL OPTIONS including both passes and point-to-point tickets via the web portal. Rail providers that only offer paper tickets can be easily searched and booked through this platform.
